CONTENTS OF VOLUME 159

Number 1, 25 July 1982

Nellen, W. and Gallwitz, D., Actin Genes and Actin Messenger RNA in *Acanthamoeba castellanii*. Nucleotide Sequence of the Split Actin Gene I 1

Skopek, T. R. and Hutchison, F., DNA Base Sequence Changes Induced by Bromouracil Mutagenesis of Lambda Phage 19

Brawner, M. E. and Jaskunas, S. R., Identification of Polypeptides Encoded by the Replication Region of Resistance Factor R100 35

Varenne, S., Knibiehler, M., Cavard, D., Morlon, J. and Lazdunski, C., Variable Rate of Polypeptide Chain Elongation for Colicins A, E2 and E3 57

Haas, R., Murphy, R. F. and Cantor, C. R., Testing Models of the Arrangement of DNA Inside Bacteriophage λ by Crosslinking the Packaged DNA 71

Liljas, L., Unge, T., Jones, T. A., Fridborg, K., Lövgren, S., Skoglund, U. and Strandberg, B., Structure of Satellite Tobacco Necrosis Virus at 3·0 Å Resolution 93

Odermatt, E., Engel, J., Richter, H. and Hörmann, H., Shape, Conformation and Stability of Fibronectin Fragments Determined by Electron Microscopy, Circular Dichroism and Ultracentrifugation . . 109

Wilson, L., Jordan, M. A., Morse, A. and Margolis, R. L., Interaction of Vinblastine with Steady-state Microtubules *in Vitro* 125

Wollenzien, P. L. and Cantor, C. R., Gel Electrophoretic Technique for Separating Crosslinked RNAs. Application to Improved Electron Microscopic Analysis of Psoralen Crosslinked 16 S Ribosomal RNA . 151

Iida, Y., Molecular Evolution of Protein. Internal Homology in the Amino Acid Sequence of Calmodulin 167

Letter to the Editor

Roy, P., Cudny, H. and Deutscher, M. P., The Transfer RNA Processing Defect in *Escherichia coli* Strains BN and CAN is Not Due to a Mutation in RNAase D or RNAase II 179

Number 2, 5 August 1982

Kamen, R., Jat, P., Treisman, R., Favaloro, J. and Folk, W. R., 5′ Termini of Polyoma Virus Early Region Transcripts Synthesized *in vivo* by Wild-type Virus and Viable Deletion Mutants 189

COWIE, A., JAT, P. and KAMEN, R., Determination of Sequences at the Capped 5′ Ends of Polyoma Virus Early Region Transcripts Synthesized *in vivo* and *in vitro* Demonstrates an Unusual Microheterogeneity . . . 225

SASAKAWA, C. and BERG, D. E., IS*50*-Mediated Inverse Transposition. Discrimination Between the Two Ends of an IS Element . . . 257

RAGGENBASS, M. and CARO, L., Intermediates of Chromosomal DNA Replication in *Escherichia coli* 273

SHAPIRO, L., MANSOUR, J., SHAW, P. and HENRY, S., Synthesis of Specific Membrane Proteins is a Function of DNA Replication and Phospholipid Synthesis in *Caulobacter crescentus* 303

ARSENIEV, A. S., WIDER, G., JOUBERT, F. J. and WÜTHRICH, K., Assignment of the ^{1}H Nuclear Magnetic Resonance Spectrum of the Trypsin Inhibitor E from *Dendroaspis polylepis polylepis*. Two-dimensional Nuclear Magnetic Resonance at 500 MHz 323

LETTER TO THE EDITOR

BUEHNER, M., LIFCHITZ, A., BALLY, R. and MORNON, J. P., Use of Molecular Replacement in the Structure Determination of the $P2_12_12$ and the $P2_1$ (Pseudo $P2_12_12$) Crystal Forms of Oxidized Uteroglobin 353

NUMBER 3, 15 AUGUST 1982

FERRIS, P. J. and VOGT, V. M., Structure of the Central Spacer Region of Extrachromosomal Ribosomal DNA in *Physarum polycephalum* . . 359

ROCHAIX, J.-D. and DARLIX, J.-L., Composite Structure of the Chloroplast 23 S Ribosomal RNA Genes of *Chlamydomonas reinhardii*. Evolutionary and Functional Implications 383

GOURSE, R. L., STARK, M. J. R. and DAHLBERG, A. E., Site-directed Mutagenesis of Ribosomal RNA. Construction and Characterization of Deletion Mutants 397

STARK, M. J. R., GOURSE, R. L. and DAHLBERG, A. E., Site-directed Mutagenesis of Ribosomal RNA. Analysis of Ribosomal RNA Deletion Mutants Using Maxicells 417

SCHNÖS, M., DENNISTON, K. J., BLATTNER, F. R. and INMAN, R. B., Replication of Bacteriophage λ DNA. Examination of Variants Containing Double Origins and Observation of a Bias in Directionality 441

SCHNÖS, M. and INMAN, R. B., Caffeine-induced Re-initiation of Phage λ DNA Replication 457

SADLER, D. M. and WORCESTER, D. L., Neutron Diffraction Studies of Oriented Photosynthetic Membranes 467

Appendix: SADLER, D. M., BRETON, J. and WORCESTER, D. L. . . 482

SADLER, D. M. and WORCESTER, D. L., Neutron Scattering Studies of Photosynthetic Membranes in Aqueous Dispersion 485

BERNENGO, J. C. and CARDINAUD, R., State of Myosin in Solution. Electric Birefringence and Dynamic Light-scattering Studies 501

POTEKHIN, S. A. and PRIVALOV, P. L., Co-operative Blocks in Tropomyosin . 519

LETTERS TO THE EDITOR

VON HEIJNE, G., Signal Sequences are not Uniformly Hydrophobic . 537

CROSS, T. A. and OPELLA, S. J., Protein Dynamics by Solid-state Nuclear Magnetic Resonance Spectroscopy. Peptide Backbone of the Coat Protein in fd Bacteriophage 543

SALEMME, F. R., Preliminary X-Ray Studies on *Chromatium vinosum* Flavocytochrome c_{552} 551

ERRATUM 553

NUMBER 4, 25 AUGUST 1982

HIRSCHEL, B. J., GALAS, D. J., BERG, D. E. and CHANDLER, M., Structure and Stability of Transposon *5*-Mediated Cointegrates 557

MANLEY, J. L., SHARP, P. A. and GEFTER, M. L., RNA Synthesis in Isolated Nuclei. Processing of Adenovirus Serotype 2 Late Messenger RNA Precursors 581

KAUFMAN, R. J. and SHARP, P. A., Amplification and Expression of Sequences Cotransfected with a Modular Dihydrofolate Reductase Complementary DNA Gene 601

JELLINGHAUS, U., SCHÄTZLE, U., SCHMID, W. and ROEWEKAMP, W., Transcription of a *Dictyostelium* Discoidin-I Gene in Yeast. Alternative Promoter Sites Used in Two Different Eukaryotic Cells 623

MOCHALOVA, L. V., SHATSKY, I. N., BOGDANOV, A. A. and VASILIEV, V. D., Topography of RNA in the Ribosome. Localization of the 16 S RNA 5′ End by Immune Electron Microscopy 637

DESSEN, P., ZACCAÏ, G. and BLANQUET, S., Neutron Scattering Studies of *Escherichia coli* Tyrosyl-tRNA Synthetase and of its Interaction with $tRNA^{Tyr}$ 651

PRIVALOV, P. L. and MEDVED', L. V., Domains in the Fibrinogen Molecule . 665

GEIGER, B., Microheterogeneity of Avian and Mammalian Vinculin. Distinctive Subcellular Distribution of Different Isovinculins. . . 685

IMAIZUMI, K., IMAI, K. and TYUMA, I., Linkage between Carbon Dioxide Binding and Four-step Oxygen Binding to Hemoglobin 703

SOMMER, J., JONAH, C., FUKUDA, R. and BERSOHN, R., Production and Subsequent Second-order Decomposition of Protein Disulfide Anions. Lengthy Collisions between Proteins 721

Appendix I: Kinetics of the Formation Reaction 740

Appendix II: Estimate of the Diffusion-limited Rate Constant . . 743

LETTER TO THE EDITOR

ANDERSON, W. F., TAKEDA, Y., OHLENDORF, D. H. and MATTHEWS, B. W., Proposed α-Helical Super-secondary Structure Associated with Protein–DNA Recognition 745

Index to Volume 159

Acanthamoeba castellanii, actin genes and actin mRNA; nucleotide sequence of the split actin gene I, 1
Actin genes and actin mRNA in *Acanthamoeba castellanii*. Nucleotide sequence of the split actin gene I, 1
Adenovirus 2 late mRNA precursor processing; RNA synthesis in isolated nuclei, 581
Amino acid sequence of calmodulin, internal homology and molecular evolution, 167
Amplification and expression of sequences cotransfected with a modular dihydrofolate reductase complementary DNA gene, 601
ANDERSON, W. F., TAKEDA, Y., OHLENDORF, D. H. & MATTHEWS, B. W., Proposed α-helical super-secondary structure associated with protein–DNA recognition, 745
ARSENIEV, A. S., WIDER, G., JOUBERT, F. J. & WÜTHRICH, K., Assignment of the ^{1}H nuclear magnetic resonance spectrum of the trypsin inhibitor E from *Dendroaspis polylepis polylepis*. Two-dimensional nuclear magnetic resonance at 500 MHz, 323
Avian and mammalian vinculin microheterogeneity; distinctive subcellular distribution of different isovinculins, 685

Backbone of the coat protein in fd bacteriophage; protein dynamics by solid-state n.m.r. spectroscopy, 543
Bacteriophage fd, peptide backbone of the coat protein; protein dynamics by solid-state n.m.r. spectroscopy, 543
— lambda, DNA base sequence changes induced by bromouracil mutagenesis, 19
— λ DNA replication, caffeine-induced re-initiation, 457
— — — — —. Examination of variants containing double origins and observation of a bias in directionality, 441
— —, testing models of the arrangement of DNA by crosslinking the packaged DNA, 71
BALLY, R. (see also BUEHNER, M.), 353
BERG, D. E. (see also HIRSCHEL, B. J.), 557
— (see also SASAKAWA, C.), 257
BERNENGO, J. C. & CARDINAUD, R., State of myosin in solution. Electric birefringence and dynamic light-scattering studies, 501
BERSOHN, R. (see also SOMMER, J.), 721
BLANQUET, S. (see also DESSEN, P.), 651
BLATTNER, F. R. (see also SCHNÖS, M.), 441
BOGDANOV, A. A. (see also MOCHALOVA, L. V.), 637
BRAWNER, M. E. & JASKUNAS, S. R., Identification of polypeptides encoded by the replication region of resistance factor R100, 35
BRETON, J. (see also SADLER, D. M.), 482
Bromouracil mutagenesis of lambda phage, and induced DNA base sequence changes, 19
BUEHNER, M., LIFCHITZ, A., BALLY, R. & MORNON, J. P., Use of molecular replacement in the structure determination of the $P2_12_12$ and the $P2_1$ (pseudo $P2_12_12$) crystal forms of oxidized uteroglobin, 353

Caffeine-induced re-initiation of phage λ DNA replication, 457
Calmodulin, internal homology in the amino acid sequence; molecular evolution of protein, 167
CANTOR, C. R. (see also HAAS, R.), 71
— (see also WOLLENZIEN, P. L.), 151
Carbon dioxide binding and four-step oxygen binding to hemoglobin, 703
CARDINAUD, R. (see also BERNENGO, J. C.), 501
CARO, L. (see also RAGGENBASS, M.), 273
Caulobacter crescentus, synthesis of specific membrane proteins is a function of DNA replication and phospholipid synthesis, 303
CAVARD, D. (see also VARENNE, S.), 57
CHANDLER, M. (see also HIRSCHEL, B. J.), 557
Chloroplast 23 S ribosomal RNA genes of *Chlamydomonas reinhardii*, composite structure; evolutionary and functional implications, 383
Chromatium vinosum flavocytochrome c_{552}, preliminary X-ray studies, 551

Chromosomal DNA replication intermediates in *Escherichia coli*, 273
Circular dichroism, use in determining shape, conformation and stability of fibronectin fragments, 109
Coat protein peptide backbone in fd bacteriophage; protein dynamics by solid-state n.m.r. spectroscopy, 543
Cointegrates, Tn*5*-mediated, structure and stability, 557
Colicins A, E2 and E3, variable rate of polypeptide chain elongation, 57
Collisions, lengthy, between proteins; production and subsequent second-order decomposition of protein disulfide anions, 721
Co-operative blocks in tropomyosin, 519
COWIE, A., JAT, P. & KAMEN, R., Determination of sequences at the capped 5′ ends of polyoma virus early region transcripts synthesized *in vivo* and *in vitro* demonstrates an unusual microheterogeneity, 225
CROSS, T. A. & OPELLA, S. J., Protein dynamics by solid-state nuclear magnetic resonance spectroscopy. Peptide backbone of the coat protein in fd bacteriophage, 543
Crosslinked RNAs, gel electrophoretic technique for their separation. Application to improved electron microscopic analysis of psoralen crosslinked 16 S ribosomal RNA, 151
Crosslinking of packaged DNA, and testing of models of the arrangement of DNA inside bacteriophage λ, 71
CUDNY, H. (see also ROY, P.), 179

DAHLBERG, A. E. (see also GOURSE, R. L.), 397
DARLIX, J.-L. (see also ROCHAIX, J.-D.), 383
Deletion mutants, analysis using maxicells; site-directed mutagenesis of ribosomal RNA, 417
— —, construction and characterization; site-directed mutagenesis of ribosomal RNA, 397
Dendroaspis polylepis polylepis trypsin inhibitor E, assignment of the ^{1}H n.m.r. spectrum; two-dimensional n.m.r. at 500 MHz, 323
DENNISTON, K. J. (see also SCHNÖS, M.), 441
DNA: amplification and expression of sequences cotransfected with a modular dihydrofolate reductase complementary DNA gene, 601
— arrangement inside bacteriophage λ, testing models by crosslinking the packaged DNA, 71
— base sequence changes induced by bromouracil mutagenesis of lambda phage, 19
— replication in bacteriophage λ, caffeine-induced re-initiation, 457
— — — — —. Examination of variants containing double origins and observation of a bias in directionality, 441
— — intermediates in *Escherichia coli*, 273
— — and phospholipid synthesis in *Caulobacter crescentus*, effect on synthesis of specific membrane proteins, 303
—, ribosomal, extrachromosomal, in *Physarum polycephalum*, structure of the central spacer region, 359
— –protein recognition and an associated α-helical super-secondary structure, 745
DESSEN, P., ZACCAI, G. & BLANQUET, S., Neutron scattering studies of *Escherichia coli* tyrosyl-tRNA synthetase and of its interaction with $tRNA^{Tyr}$, 651
DEUTSCHER, M. P. (see also ROY, P.), 179
Dictyostelium Discoidin-I gene, transcription in yeast; alternative promoter sites used in two different eukaryotic cells, 623
Dihydrofolate reductase complementary DNA gene, amplification and expression of cotransfected sequences, 601
Discoidin-I gene from *Dictyostelium*, transcription in yeast; alternative promoter sites used in two different eukaryotic cells, 623
Disulfide anions of protein, production and subsequent second-order decomposition; lengthy collisions between proteins, 721
Domains in the fibrinogen molecule, 665

Early region polyoma virus transcripts synthesized *in vivo* and *in vitro*, determination of sequences at the capped 5′ ends demonstrates an unusual microheterogeneity, 225
— — — — — — — — by wild-type virus and viable deletion mutants, mapping of the 5′ termini, 189
Electric birefringence and dynamic light-scattering studies of the state of myosin in solution, 501
Electron microscopic analysis of psoralen crosslinked 16 S ribosomal RNA, application of gel electrophoretic technique for separating crosslinked RNAs, 151
— microscopy, use in determining shape, conformation and stability of fibronectin fragments, 109
ENGEL, J. (see also ODERMATT, E.), 109
Escherichia coli, intermediates of chromosomal DNA replication, 273

— —, the transfer RNA processing defect in strains BN and CAN is not due to a mutation in RNAase D or RNAase II, 179
— — tyrosyl-tRNA synthetase and its interaction with $tRNA^{Tyr}$; neutron scattering studies, 651
Evolution, molecular, of protein. Internal homology in the amino acid sequence of calmodulin, 167
Evolutionary and functional implications of the composite structure of the chloroplast 23 S ribosomal RNA genes of *Chlamydomonas reinhardii*, 383

Favaloro, J. (see also Kamen, R.), 189
fd (see also Bacteriophage), 543
Ferris, P. J. & Vogt, V. M., Structure of the central spacer region of extrachromosomal ribosomal DNA in *Physarum polycephalum*, 359
Fibrinogen molecule domains, 665
Fibronectin fragments, determination of shape, conformation and stability by electron microscopy, circular dichroism and ultracentrifugation, 109
5′ end of 16 S RNA, localization by immune electron microscopy; topography of RNA in the ribosome, 637
— ends, capped, of polyoma virus early region transcripts synthesized *in vivo* and *in vitro*, determination of sequences demonstrates an unusual microheterogeneity, 225
— termini of polyoma virus early region transcripts synthesized *in vivo* by wild-type virus and viable deletion mutants, 189
Flavocytochrome c_{552}, *Chromatium vinosum*, preliminary X-ray studies, 551
